*Please refer to the above color chart expressed by offset printing four colors.

▶ Evaluation Results

Our works

▶ Application

- For the places that moisture permeability is especially required, such as dry riverbed and flood control basin.
- For the places that anti-slip property is required, such as poolside.
- Pavement and open space.

▶ Characteristics

- Easy to handle, being designed as one-component water-based paint.
- Excellent coating performance, such as air / moisture permeability and durability.
- High anti-slip property effective even on a rainy day.
- Blistering doesn't occur after coating on asphalt and concrete.

▶ Construction method

[A-1]

Three times coating for asphalt / concrete dust proof specification.

[A-3]

Four times coating for asphalt / concrete super durable specifications. Special aggregate is used, ideal for roller skating rink, etc.

[C-5]

Three times coating for abrasion resistant specification of concrete. Strong adhesive performance to concrete.
