

# Colorants

## Applications

- For coloring solvent-based polyurethane resin solution for synthetic leather
- For surface finishing of synthetic leather
- For coloring polyurethane resin

## Characteristics

- With a long track record of developing colorants for polyurethane resin solutions, these products are applicable to a wide range of polyols and processing methods.
- We offer an extensive product lineup with various excellent characteristics, including weather fastness, suitable for a wide range of applications such as automotive interior materials that require a high level of durability.
- We also offer our base colors for matching the colors conforming to market demand.

## Representative Products

Product name	Applicable PU/PUD
Solvent-based colorants for solution-polymerized polyurethane resin (PU)	
BS #100(S) series	High durability polycarbonate-based PU
BS #1000 series	Wet/semi-non-yellowing polyester-based PU
ALT #8000 series	Dry/semi-non-yellowing polyester-based PU
MA #8000 series	Two-component/semi-non-yellowing polyester-based PU
DUT #4000 series	Semi-non-yellowing polyether-based PU
Water-based colorant for PUD	
DW #1000 series	Water-based polyurethane dispersion (PUD)

### ■ Functional coatings

# Conductive paints

## Applications

- Capable of applying conductivity to solution type polyurethane resin.
- High-resistance value electric properties such as antistatic and sensors.

## Characteristics

- Urethane-based conductive paints with uniformly dispersed carbon-based fillers.
- Capable of adjusting resistance by blending with polyurethane resin.
- Capable of adjusting resistance value such as conductive and antistatic regions.
- Excellent storage stability with no filler settling.

## Representative Products

Product name	Applicable PU/PUD
Conductive paints for solution type polyurethane resin	
CD series	Polyester/Polycarbonate
Conductive paints for water-based polyurethane dispersion	
CDW series	Water-based polyurethane dispersion

### ■ Various other functional paints

We can apply various functions to urethane paints. Please feel free to ask any questions.
