

Water-based Acrylic Paints for Road and Floor

Application

- Paints for colored concrete and asphalt floors
- Paints for colored all-weather pavement such as tennis court

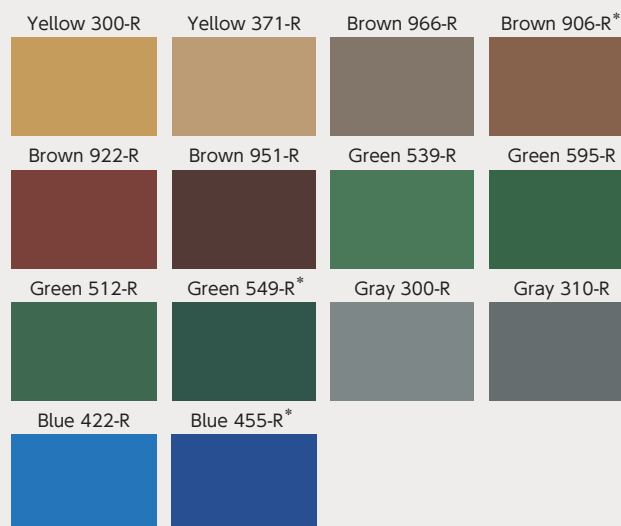

Characteristics

- An acrylic emulsion paint combining excellent light-fastness of inorganic/organic pigments and properties of acrylic resin.
- Over 30 years of sales performance.
- Our paints have a low likelihood of blistering failures in coating film because of the high moisture permeability. (However, paint surface recoated for repairing may cause the problem.)
- We offer "Hard type" (hard surface paint) and "Soft type" (soft type paint), and also a quick drying paint as "Hard type" especially available in a low temperature period of winter season.

Representative Products

16 colors in total : 14 standard colors, white, and black.
